

Dear Prospective Student:

For over fifty years, Trocaire College has produced Registered Nursing graduates with the values, knowledge and skills required to impact the world. The college is accredited by the Middle States Association of Colleges and Universities and its Associate Degree in Nursing program is accredited by the National League for Nursing Accrediting Commission. The Bachelor of Science in nursing program has been granted candidacy status by the National League for Nursing Accrediting Commission and is in the last stages of obtaining full accreditation.

We believe that there is a significant difference in the success of graduates of Trocaire College from other comparable colleges. Thus, we are offering an innovative and exciting new bachelor of science in nursing program. It focuses on the development of higher level knowledge and skills required to provide comprehensive nursing care in various clinical practice settings and builds on previous knowledge acquired in lower division nursing courses and prior professional experiences. Scheduling is flexible to accommodate work hours and other lifestyle requirements. Courses, all of which are offered as distance education in the hybrid or blended format, are designed specifically for the practicing nurse, drawing from and expanding upon real-life professional nursing experiences.

As a registered nurse you can advance your nursing careers by earning a baccalaureate degree in as few as 16 months. Clinical requirements include 84 hours in the community and in health care settings of your choice. You will be allowed to complete clinical assignments at facilities where you are employed; provided that the facility is approved by the college to provide this experience and that it is consistent with the goals and objectives of the clinical assignment.

I look forward to meeting you in the near future.

Sincerely

A handwritten signature in cursive script that reads "Marian C. Meyers". The signature is written in black ink and is positioned above the typed name.

Marian C. Meyers, Ed.D; RN
Academic Dean of Nursing Studies
